Work Experience

App Tranner

01/10/2020 - 02/2/2021

- I started training and learning new software skills with this company, which helped me choose the best software path for me, which is. Mobile application development was a great opportunity to familiarize with environment of information technology companies
- My job as a trainer in this company was to teach Mobile application development and help the development team

06/2021 - 08/2021

Khadmat App

I worked as a QA within an emerging company that developed an application through a software company. My job was to ensure the verification of the features and functions that we were asking to be included within the application. Review the work of the mobile development department and test the application on three platforms: Android, iOS, Huawei, verifying white test cases. And black test cases until we reach the required level of software we want

08/2021 - Until now

Blue Ray for Web Solutions

- Solo player ios Developer
- As a solo iOS developer, this has given me the opportunity to understand and work on all forms of the iOS application lifecycle to build all applications from start to finish, choose the most appropriate way to engage with other team members such as designer team and back-end team, and make fluid decisions that enable the best version of the application
- I started working as a developer of iOS applications in Swift, which continues until now, working on large applications and limited time, such as government tenders, working as a team and using software development tools such as Jet, Postman and JERA
- Dealing with a UI & UX app with animation design

- Dealing with a third party API (Json , Xml)
- Dealing with SDK & Integration Such as Printer , Push Notification
- I Built more than two E-Commerce Application , three educational App, development tow government application
- Working with different SDKs (Software Development Kits)
